Pullman, WA 99164, USA

## Education

**Ph.D. in Applied Mathematics** Jan 2023 – Present
Washington State University, Pullman, WA
Cumulative GPA: 3.98/4.0
Dissertation: *Data-Driven Model Discovery and Reduced-Order Modeling of Governing Differential Equations using Machine Learning and Optimization*

**M.Sc. in Mathematical Engineering** Oct 2020 – Jul 2022
Urgench State University, Khorezm, Uzbekistan
GPA: 4.6/5.0
Dissertation: *Research of Dynamic Systems Modeling Cyclic Processes*

**B.Sc. in Applied Mathematics and Informatics** Aug 2016 – Jun 2020
Urgench State University, Khorezm, Uzbekistan
GPA: 83/100

## Work Experience

**University Teaching Assistant** Jan 2023 – Present
Washington State University, Pullman, WA
- Served as teaching assistant for Calculus, Linear Algebra, Probability & Statistics, and Differential Equations (class sizes 20–100+): ran labs, graded coursework, and proctored exams.
- Assisted faculty with lecture preparation and led undergraduate review sessions.
- Tutored students and held office hours at the Math Learning Center.

**Dare to Dream Program Teacher** Jun – Jul 2023
Washington State University, Pullman, WA
- Taught interactive science lessons to incoming college students to ease the transition from high school.
- Worked with mentors and coordinators to run daily enrichment sessions and track individual student progress.

**Teaching Assistant** Aug – Dec 2022
Fiscal Institute & Millat Umidi University, Uzbekistan
- Taught informatics, programming, and foundational computer science (incl. Microsoft Office, computer architecture) across two institutions.
- Prepared students for national and international programming competitions.

## Internships and Workshops

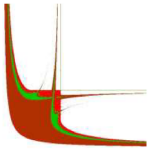

- **Dynamical Systems for Machine Learning and AI** – SLMath Graduate Summer School, IBM Thomas J. Watson Research Center, Yorktown Heights, NY Jul 2026

## Talks and Conferences

*On Hamiltonian Monte Carlo for Gaussian Random Variables* – Group talk with Rafael Fernandes, Luan Lopes, **Lazizbek Sadullaev**, and Edison Vazquez, IBM Thomas J. Watson Research Center, Yorktown Heights, NY.

## Publications

**Julia and Mandelbrot Sets for Multi-Dimensional Logistic Mapping**
Journal of Central Asian Problems, 2020

Mandelbrot set on $(\lambda, \mu)$ plane.

## Technical Skills

Python (Intermediate), R (Basics), SQL (Basics), C++ (Basics), MATLAB (Basics), Microsoft Office

## Honors & Awards

- AMS-ICM 2026 Graduate Student – NSF #2620718 Travel Grant Recipient, Philadelphia, PA (2026)
- Academic Excellence Scholarship, awarded for ICPC contest participation and maintaining an outstanding GPA, Urgench State University (2018–2020)
- Winner, Nationwide Virtual Olympiad, Tashkent (2016)
